

Pakorn Chaowanaprasert (Kur)

Lead Developer

patapuputapa@gmail.com 0885797989 Bangna Bangkok, Thailand

Summary

Lead Developer with 8+ years of experience who does far more than write code — architecting systems, designing database schemas, deploying to production, and leading teams to deliver CRM platforms for 15+ enterprise clients, from Millennium Auto to CP-Meiji. Specializes in building config-driven systems that teams can extend without waiting on a developer — full-cycle CRM platforms spanning Sales, Marketing, Service, and Field Service. Currently works AI-first, using Claude Code as a core part of the development workflow.

- Delivered CRM platforms to 15+ enterprise clients — no two alike — spanning Sales, Marketing, Service, and Field Service
- Built config-driven systems that cut new-page setup time from days to hours
- Owns the full cycle end-to-end — architecture → development → deployment → migration
- Leads a team of 5 with a code review culture that keeps quality consistent
- Runs a Docker + Nginx + Jenkins + Kubernetes pipeline for confident, everyday deployments
- Full-cycle CRM with 90+ pages: Lead, Opportunity, Quotation, Case Management, Field Service, Campaign, Customer 360
- Real-time features: Socket.IO chat, AI chatbot, live notifications

Skills

Languages

- JavaScript
- TypeScript
- PHP

Frameworks

- React
- Next.js
- Node.js
- Ant Design
- Material-UI
- Vue.js
- Prisma
- Socket.IO

Databases

- PostgreSQL
- MySQL
- Redis

Devops

- Docker
- Nginx
- Jenkins
- Kubernetes

Tools

- Git
- n8n
- Figma
- GitHub Copilot
- Kiro (AI IDE)
- Claude Code

Soft Skills

- Config-driven System Design — systematically reducing development time
- Team Leadership & Code Review Culture
- Database Schema Design & Migration Planning
- Technical Consulting — translating business needs into technical solutions
- Cross-project Code Sharing & Reusable Architecture
- CRM Domain Expertise — Sales, Marketing, Service, Field Service workflows
- Multi-tenant SaaS Architecture Design
- Real-time System Design (WebSocket, Event-driven)
- AI-Assisted Development — primarily uses Claude Code, designing dynamic pipelines through an orchestrator that adaptively routes work to specialized sub-agents, in contrast to Kiro's linear spec-driven pipeline (spec → design → tasks); hands-on experience progressing from Copilot → Kiro → Claude Code

Experience

MSC (Team 5)

Development Leader (2025-01 - present)

Senior Programmer (2021-01 - 2024-12)

Programmer (2019-09 - 2020-12)

Leads development of CRM platforms for 15+ large enterprise clients — covering everything from coding and deployment to database design and migration.

- Architected and designed database schemas for both S-CRM (React SPA) and Next-S-CRM (Next.js 15) platforms
- Deployed and maintained production environments (Docker, Nginx, Jenkins, Kubernetes on Azure & IBM Cloud)
- Built shared components / cross-project code sharing — 80+ reusable UI components
- Planned and executed migration from legacy systems to the new platform — designing database schema, data mapping, and UX flow

Tech

JavaScript React Next.js Ant Design Material-UI Styled Components Socket.IO Chart.js Nivo n8n
PostgreSQL Prisma Redis Docker Nginx Jenkins Kubernetes Azure AD (MSAL) Google Maps API Git

CDG

Programmer (2017-11 - 2019-04)

Developed web applications for a government agency's examination system and royal decoration (honors) system.

- Developed frontends with Vue.js and React
- Built backend APIs with PHP
- Designed and optimized SQL queries

Tech

PHP JavaScript Vue.js React MySQL Git

Projects

S-CRM Platform - CRM Platform

The company's flagship CRM platform, deployed to 14+ enterprise clients, each with its own customizations and modules. Maintained and continuously developed for 4+ years — covering Sales, Marketing, Service, Field Service, and Customer 360 in a single system.

Tech

React 16 JavaScript Ant Design Material-UI Styled Components Socket.IO Chart.js Nivo React Router Redux Axios PostgreSQL Redis Docker Nginx Jenkins Kubernetes Azure AD (MSAL) GitHub Copilot

Full-S-CRM (Next-S-CRM) - CRM Platform

A next-generation CRM platform that fully redesigns the architecture of the original S-CRM — migrating from a React SPA to the Next.js 15 App Router, replacing raw SQL with Prisma ORM, adding a Redis session/cache layer, and introducing a config-driven CRUD system that cuts boilerplate by over 70%.

Tech

Next.js 15 React 19 JavaScript PostgreSQL Prisma Redis Docker Nginx Ant Design Tailwind CSS MinIO Azure AD n8n Kiro (AI IDE) Claude Code

CP-Meiji Material Request - Enterprise Web App

A Material Request system for CP-Meiji, designed and built entirely from scratch — covering multi-department approval workflow, a config-driven dynamic form engine, expression-based validation, row-level access control, Azure AD SSO, and a migration plan from the legacy system. Supports 4 document types (Create, Extend, Edit, Deletion).

Tech

Next.js 15 React 19 JavaScript PostgreSQL Prisma Redis Ant Design Tailwind CSS MinIO Azure AD (MSAL) Lucia Auth Docker Nginx

S-ERP Dashboard - ERP System

Built dashboards for an ERP system and provided consulting on recalculation logic.

Tech

React JavaScript PostgreSQL n8n

CRM Lead & Opportunity Management - CRM Module

A Lead and Opportunity pipeline management system for S-CRM — covering lead capture, qualification scoring, pipeline stages, and conversion to customer, complete with commit target tracking and sales forecasting.

Tech

React JavaScript Ant Design Chart.js PostgreSQL

CRM Case Management & Field Service - CRM Module

A Case Management system for after-sales service — supporting case creation, SLA tracking, process-step workflow, field service dispatch, and work order management, with Google Maps integration for routing.

Tech

React JavaScript Ant Design Google Maps API Socket.IO PostgreSQL

CRM Quotation & Sales Order - CRM Module

A Quotation and Sales Order system for S-CRM — supporting product catalog, price list management, discount rules, multi-currency, and approval workflow, with PDF generation.

Tech

React JavaScript Ant Design ExcelJS PostgreSQL

S-Loyalty Platform - Loyalty & CRM Platform

A loyalty platform covering both a member-facing app (points collection, reward redemption) and an admin back-office — bootstrapped a translation system (next-intl + DB-driven content per language) and a centralized CRUD framework the team could immediately build on. Supports multi-language CMS, role-based access control, MinIO file storage, and interactive transaction management.

Customer Portal - Customer Service / Case Management

A new product for managing the full support case lifecycle — from opening a case, tracking status, and reopening through to closure, with an all-in-one overview dashboard. Designed as a modular product that can be bundled with CRM customer service or used standalone. Built AI-first with Claude Code, from architecture through implementation.
